ADJUST the string length of each student’s yo according to the instructions below.

A. MEASURE THE STRING

Let the string all the way out and set the yo-yo on the ground next to the student’s shoe. Pinch the string at the student’s elbow and let the top part drop. Slide your other finger down two inches.

B. MAKE A SOLID LOOP

Now, tie a new knot by wrapping the string around your fingernail one time and pinching it with your thumb, just like tying a water balloon. Slide it off your finger. Slip the end underneath and pull it through to form a loop that’s the size of a penny.

C. MAKE A SLIP LOOP

This loop will fit any size finger, so the yo-yo doesn’t fall off your hand. Place the yo between the first and second knuckle on the middle finger.

Pull the knot tight and cut off the extra string with a pair of scissors.

ADJUSTING WRAPS

MULTIPLE WRAPS for easy play

ONE WRAP for string tricks

Always keep 3 wraps on the Boomerang®

HOW TO WIND THE STRING on a sleeper yo

1. Make the first wrap over one finger.
2. Continue to wrap string around the axle, to the side of your finger, 2-3 times.
3. Remove finger and gently continue wrapping until wound.
4. The finger loop will disappear when you throw the yo-yo down!
